

IN THE CLAIMS:

- 1 1. (Currently Amended) A reusable pin support fixture which comprises:
2 an upper apertured foil;
3 a lower apertured foil;
4 means for maintaining the foils in spaced apart relationship, the apertures of the foils
5 being in registration;
6 a plurality of pins having a support end and a base end, the base end secured to the
7 lower foil and the support end passing through an aperture and the upper foil; and
8 means for fixedly securing the pins in the lower foil.
- 1 2. (Original) The fixture of claim 1 wherein the geometry of the fixture is configured
2 such that it can be seen through for pin placement.
- 1 3. (Previously Presented) The fixture of claim 1 wherein means for securing the pins is a
2 magnetic plate.
- 1 4. (Original) The fixture of claim 1 wherein the base end is U-shaped.
- 1 5. (Previously Presented) The fixture of claim 1 wherein the pins and apertures are
2 dimensioned to prevent lateral displacement of the pins when they are received in the
3 apertures.
- 1 6. (Original) The fixture of claim 1 wherein the means for maintaining in spaced-apart
2 relationship is a spacer frame.

- 1 7. (New) The fixture of claim 1 wherein the pins are removable
- 1 8. (New) The fixture of claim 1 wherein the pins may be rearranged in the apertures.
- 1 9. (New) The fixture of claim 1 wherein the fixture may be disassembled and then
2 reassembled.
